DETAILED ACTION

1. The amendment filed October 4, 2002, has been received and entered. The text of those sections of Title 35, U.S. Code, not included in this action can be found in a prior Office action.
2. Claims 1-8 and 10 have been cancelled.
3. Claims 9 and 11-23 are pending.
4. In Paper No. 5, applicant elected with traverse of Group V, claims 11 and 14-23 and phenolic acid, specifically cinnamic acid for species D. Claims 9, 12, 13, and 15-20 are withdrawn from further consideration.
5. Claims 11, 14, and 21-23 are examined on the merits.

Claim Rejections - 35 USC § 102

6. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Marwan et al. (J. Food Sci. (1982), vol. 47, no. 3, pp. 774-778) for the reasons set forth on page 3 of the previous Office action.

All of applicant's arguments regarding this ground of rejection have been fully considered but are not persuasive. Applicant argues that the compounds isolated by Marwan are not suitable for administration to a subject. However, since the chemicals isolated by Marwan are the same chemicals that are claimed, it is unclear what characteristics of the chemicals of Marwan make them unsuitable for administration.

7. Claims 11 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Merck Index (Budavari et al., eds. (1989). Merck and Co., Inc.: New Jersey, pp. 358, entry 2300) for the reasons set forth on page 4 of the previous Office action.

All of applicant's arguments regarding this ground of rejection have been fully considered. Applicant argues the reference does not teach the claims because the reference does not teach isolating the chemical from cranberry. However, the claims are drawn to a composition of cinnamic acid not a method for isolating cinnamic acid. Cinnamic acid is the same compound regardless of the source of the acid. Therefore, the limitation of isolation from cranberry is not considered to make the composition of cinnamic acid taught by the Merck Index patentably distinct from the claimed composition because the compositions are the same.

In addition, applicant argues that the compound in the Merck Index is not suitable for administration to a subject. However, since the composition taught by the reference is the same as the claimed composition, it is unclear what characteristics of the reference composition make it unsuitable for administration.

8. Claims 11, 14, and 21-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Camire et al. (J. Food Prot. (1980), vol. 43, no. 1, pp.36-37) for the reasons set forth on page 4 of the previous Office action.

All of applicant's arguments regarding this ground of rejection have been fully considered but are not persuasive. Applicant argues that the cinnamic acid used in Camire was not isolated from cranberry. However, the claims are drawn to a composition of cinnamic acid not a method for isolating cinnamic acid. Cinnamic acid is the same compound regardless of the source of the acid. Therefore, the limitation of isolation from cranberry is not considered to make the composition of cinnamic acid taught by the Camire patentably distinct from the claimed composition because the compositions are the same.

Applicant also argues that Camire teaches away from adding cinnamic acid to the cranberry juice because Camire teaches that the cinnamic acid does not increase the stability of the cranberry juice. However, this argument is not persuasive because this is a 102 rejection. The reference teaches a composition of cinnamic acid in forms that encompass the administration forms claimed by applicant. Since Camire has disclosed a composition that meets all of applicant's claimed limitations, the claimed composition is not patentably distinct from what was disclosed in the reference.

9. No claims are allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
